

DIAA SAMIR ABDELAZEEM ELSADEK

Full-Stack Developer | React, Next.js, ASP.NET Core

Zagazig, Egypt | +201117244172 | diaaelsadek1@gmail.com | diaaelsadek.me | linkedin.com/in/diaaelsadek | github.com/DiaaElsadek

PROFESSIONAL SUMMARY

Full-Stack Developer specializing in JavaScript/TypeScript and .NET: React, Next.js, Node.js, Express, and MongoDB on one side, ASP.NET Core and SQL Server on the other. Owns production products end to end, from architecture and REST API design to deployment, including a multi-tenant SaaS platform for educators, a healthcare service marketplace with role-based workflows, and a facility booking system. Freelance since February 2024, working directly with clients and stakeholders.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, SQL, C++, Java, Python

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design

Backend: Node.js, Express.js, ASP.NET Core, ASP.NET MVC, REST APIs, Swagger/OpenAPI, Entity Framework Core, LINQ

Databases: SQL Server, MongoDB

Cloud & DevOps: CI/CD Pipelines, GitHub Actions, Docker, Virtual Machines (VMs), Vercel

Engineering: OOP, Clean Architecture, Design Patterns, Data Structures & Algorithms

Product & Analysis: Requirement Analysis, System Design, SaaS & Marketplace Concepts, Software Development Life Cycle (SDLC)

Tools: Git, GitHub, Postman, Figma

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer | Freelance, Remote

Feb 2024 - Present

- Own freelance projects end to end with no dedicated team: requirements, architecture, API and database design, UI, and production deployment on Vercel.
- Build backends in Node.js/Express and ASP.NET Core using clean architecture and OOP, exposing REST APIs consumed by React frontends.
- Work directly with clients and stakeholders to turn business requirements into shipped products, including Apex Gym, a responsive website delivered to a real gym client and built to run locally per their requirements (apex-gym-sandy.vercel.app).

SELECTED PROJECTS

EduCenter | Multi-Tenant SaaS Platform for Educators | educenter.tech

2026

- Architected a multi-tenant SaaS platform that lets individual teachers launch and run independent, branded education businesses on shared infrastructure, similar in model to store-builder platforms but built for education.
- Designed multi-tenancy and tenant data isolation as core architectural concerns from the start, rather than adapting a single-teacher website.
- Built the modules a teacher needs to operate a business: student management, content monetization, and analytics dashboards.
- Integrated local payment acceptance and role-based access for teachers and students.
- Designed integration points for AI-powered educational tools and deployed the platform to production.

Al-Anis | Healthcare Service Marketplace & Booking Platform | al-anis.vercel.app | github.com/DiaaElsadek/al-anis

2025

- Built a marketplace connecting users with healthcare providers (nurses), with role-based workflows for users, providers, and admins, including provider applications and approval and an admin dashboard.
- Implemented the booking core: provider availability, service requests, and shift-based service pricing.
- Developed the ASP.NET Core REST API (OTP-based authentication, payments, chat, reviews), documented with Swagger/OpenAPI, and the React frontend that consumes it.

Z-Sports | Sports Facility Booking Platform | z-sports-eta.vercel.app

2026

- Built a booking platform where users and groups discover football and tennis courts and reserve time slots, with availability and scheduling logic.
- Implemented the backend and database layer for facilities and reservations, with a responsive interface for the booking flow.

UniStream22 | University Collaboration Platform | uni-stream22.vercel.app

2025

- Developed and deployed a hub that centralizes course materials, announcements, schedules, and discussion for a university cohort.

EDUCATION

B.Sc. in Computer and Information Science | Higher Technological Institute (HTI), 10th of Ramadan City, Egypt

2022 - 2026

TRAINING, CERTIFICATIONS & ACHIEVEMENTS

- Digital Egypt Pioneers Program (DEPI), Round 3:** Full-Stack ASP.NET Web Development (Jun 2025 - Dec 2025)
- Route Academy:** Frontend Development with React.js (Feb 2024 - Aug 2024)
- The 2024 ICPC ECPC Qualifications:** Honorable Mention Award (Jul 2024)
- ICPC Training, HTI:** Levels 0 and 1; served as Instructor for Level 0 students (Jan 2024 – May 2024)
- Kian Academy:** Problem Solving with Python & C++ (Jul 2023 - Sep 2023)

LANGUAGES

- Arabic:** Native
- English:** Very Good
